Wilson Baiardo® Stringing Machine

Baiardo® Stringing Machine

Baiardo is the first stringing machine designed using the revolutionary Wilson B.E.S.T stringing system (Biomechanically Efficient Stringing Technology). Multiple ergonomic features provide unprecedented user comfort. Baiardo automatically adjusts height and tilt 3 times during the stringing process (mounting, mains, crosses) putting the string bed in a biomechanically perfect position. Stringers experience less stress on the lower back, shoulders, neck, arms, etc. Baiardo is also the most customizable stringing machine with 13 personalized stringer settings. Baiardo remembers all personal settings for up to 6 different stringers. Just enter your name and height and Baiardo does the rest! Baiardo is controlled with an industry-first touch screen interface that is intuitive and fast. With the B.E.S.T system, stringers are faster and more efficient during a long day of stringing. Stringers feel better at the end of the day due to superior ergonomic design.

"A unique machine that does so many things no other stringing machine has ever done before."

Racket Sports Industry, Sept. 2009
